## How to leverage the Saudi Arabia Renewable Energy local supply chain opportunity

### SASIA & SAWIA

Our **mission** is to expand the use of all solar and wind technologies at the national and regional level, while fostering the growth of the renewable energy supply chain in the KSA

To create jobs for nationals and opportunities for local b2b sourcing

- To provide high-level networking and learning opportunities through workshops, conferences and publications
- To assist policy-makers with developing renewable energy policy
- To support international solar companies in getting established and connected in KSA
- To advance the development of solar and wind technologies, product standards and certification through technical and academic cooperation with organizations worldwide
