# First Pilot Project to monetize the cost of decarbonizing

## Goals:

- Accelerate the decarbonization, through monetization of the actual GHG\* displaced through the anticipated decommissioning of coal-based power plants

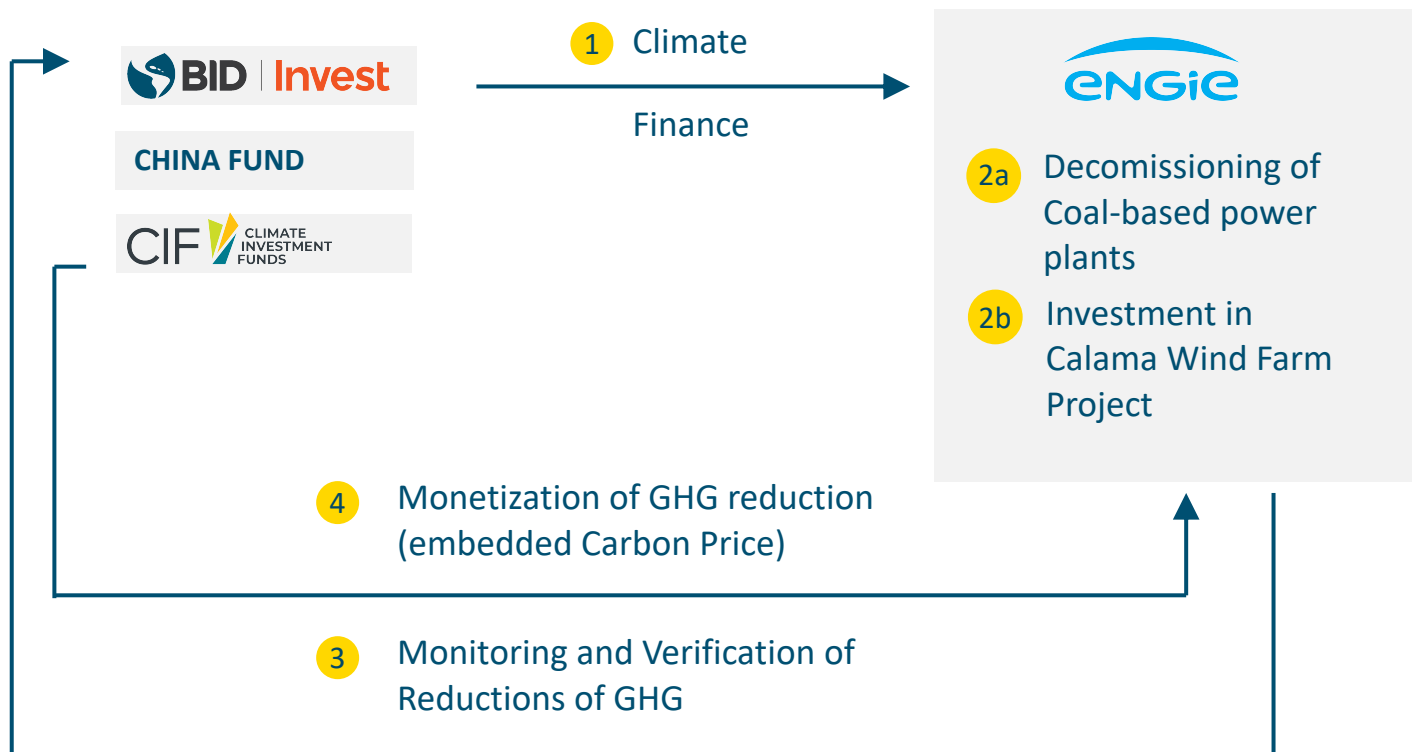

- The proceeds of the financing will be applied to build a new 152 MW windfarm, which energy replaces the coal-based generation.

\* Greenhouse Gases

Energía

## ¿How does it work the financing of the first Project to monetize the cost of descarbonization ?
